

/SI211/proj/p02/Project 2 Cover Sheet

Your Name: Soren Patel Your Alpha: 284932 Section: P6

Step/Function(s) # being submitted: 0 1 2 3 4 5

Describe any extra credit performed: part 6 complete (+10 pts eligible)

The maximum amount of credit his assignment is eligible for (check one):

- ☒ Full credit (i.e. submitted before "COB" on due date. See policy for "COB" definition.)
☐ 3^N off (i.e. submitted by "COB" on Nth business day after due date. For me, N = _____ (fill in if late))

Honor: By my signature below, I certify that all work on this project (except where documented otherwise) is my own. [Recall that CS Department Policy only allows help either directly from your instructor or, with your instructor's direct permission, from a reference source outside the course material. This year's SI211 Course Policy also allows help from the other SI211 instructor (i.e. either Capt Garcia or Dr. Brown), but any such help must, be documented.]

Signature: 

By my second signature below, I certify that I gave no assistance to anyone else on this project.

Signature: 

Feedback (reasonable answers required for full credit but will not otherwise affect your grade)

1. How long did this assignment take you to complete, outside of class?

0.5 hr 1 hr 2 hrs 3 hrs 4 hrs 5 hrs 6 hrs Other: >10 hours

2. What was the best part about his assignment?

The object-orientedness with the encryption/hash algs was satisfying

3. The worst?

Constant refactoring of code into helper methods
Using exceptions

4. Do you think your assignment is ...(circle one)

- All correct and complete
☐ Mostly correct and complete Mostly correct, but not complete
☐ Mostly complete, but not all correct Neither correct nor complete
☐ Other _____

☒ 5. If you couldn't get his assignment mostly correct and complete, what was the primary reason? (circle one or two)
 Didn't start soon enough Too busy with other things Was harder than I expected Couldn't understand directions
 Couldn't understand the concepts Other _____

6. Was this assignment: (circle one) Way too easy Little too easy About right Little too hard Way too hard

7. In class/lecture, was the discussion of material relevant to this assignment:

Way too slow Little too slow About right Little too fast Way too fast

8. Is there anything that we (the instructors) could have done better? Or other comments?

Good project, workload/time commitment stacks up
though especially with projects of other CS classes.
